MyORA - submission system powered by Hydra

Using PROV-DM

PROV data model

RDF Metadata

What's different?

sufia hydra

What's new?

Multiple content types and files

thesis

article, paper, book

data

Multiple files per object
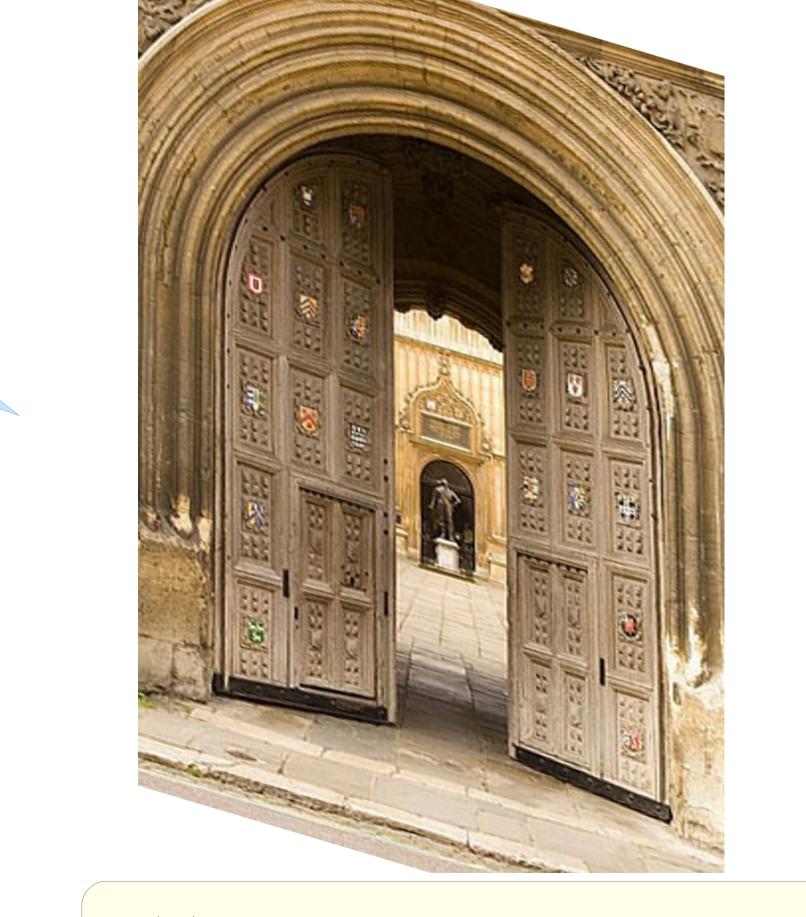

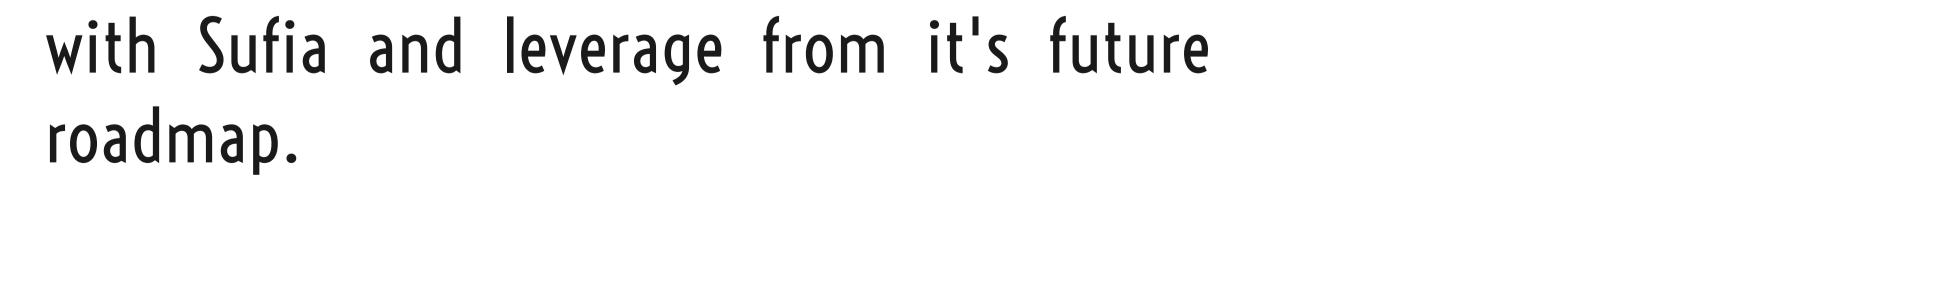

The Bodleian Digital Library is actively developing MyORA, a submission system based on Sufia version 3.7, extending the functionality of Sufia to work with the unified content model, handling different content types and integrating current practices for supervising and administering deposits.
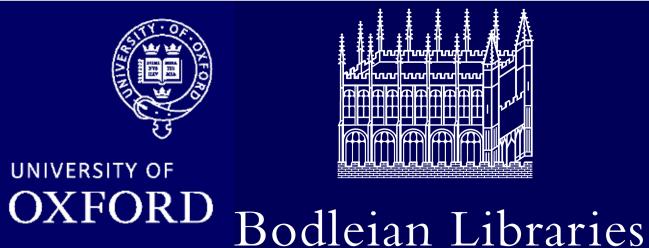

Currently, we are working for launching it across the university in the new year. We are also doing a lot of work in migrating all of our existing objects, so that they too can be managed using MyORA. Going forward, we'd like to harmonize the work put into MyORA with Sufia and leverage from it's future roadmap.

Review workflow for deposits

Mediated submissions
