

Hydra Display Sets*

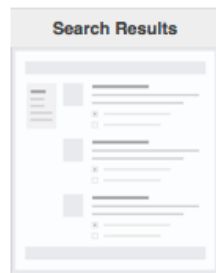

Pages affected by the Display Sets Working Group Recommendations

* Hereafter referred to as "collections"

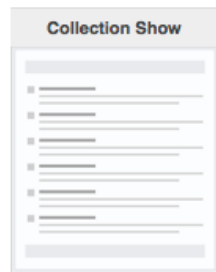

Public pages

- Global search box: "Collections" search constraint
- Main menu: Potential "Collections" menu item for easy access to list of collections
- Potential for featuring collections on homepage

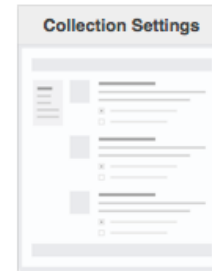

- Facets: "Collections" facet available whenever facets are shown
- Distinguish types of collections (e.g., label) in results that include collections

- Optional branding shown
 - List includes works/nested collections
 - Search within collection
- If user has appropriate role:*
- Edit / Delete buttons
 - Add Work / Create Work buttons
 - Add (new | existing) Subcollection button

Administration pages

- Define collection types
- Collection type configuration, with settings for each collection type:
 - Participants (managers and creators)
 - Nestable?
 - Multiple membership?
 - Discoverable?
 - etc.

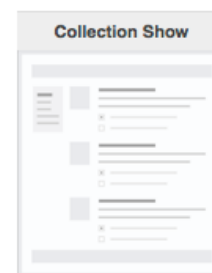

- Button: Create new collection
- Show list of collections user can manage or deposit into
- Actions for collections:
 - Show collection
 - Add works to collection
 - Deposit new works through collection

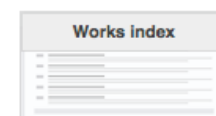

- Select type of collection to create

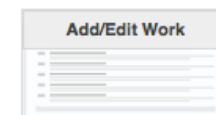

- Edit collection description
- Edit collection branding
- Edit collection visibility
- Edit collection sharing
- Edit collection workflow
- Delete collection

- Show list of items in collection
- Actions for collections:
 - Edit collection
 - Add works to collection
 - Deposit new works through collection
 - Remove works from collection

- Bulk action: Add selected works to collection

- Add work to collection(s)

Institution Digital Repository repo-manager@institution.edu

Repository Home > Administration > Settings > Collections

Collections

Collection Types: Administrative collection | User Collection | Exhibit

You can add as many collection types as you need. After a new collection type is added, a new tabbed page will be available to configure settings and add authorized participants for that collection type.

Add Collection Type

Name Add

Current Collection Types

NAME	ACTIONS	
Administrative collection	Rename	
User collection	Rename	Remove
Exhibit	Rename	Remove

1 The working assumption is that Administrative Sets are now just part of collections, but there is one required collection that exists by default called "Administrative collection." This can be renamed but not deleted, to ensure that works always belong to at least one collection.

2 At the time of creating this mockup, Hyrax does not have secondary menu items for Settings, but I believe it should, to support this Collections settings page and other future configuration settings. It should probably just follow the Settings menu pattern currently in Hyku.

Workflow Roles

Collections

- Collection Types
- Administrative Collection
- User Collection
- Exhibit

General Settings

These settings determine how collections of the type "Administrative collection" can be managed and discovered.

- NESTABLE Allow collections to be nested (a collection can contain other collections)
- MULTIPLE MEMBERSHIP Allow a work to belong to multiple collections
- DISCOVERY Allow collections to be discoverable
- REQUIRE MEMBERSHIP A work must belong to at least one collection of this type
- SHARING Allow users to assign collection managers, depositors, and viewers for collections they manage
- WORKFLOW Allow collections of this type to assign workflow to a new work
- VISIBILITY Allow collections of this type to assign initial visibility settings to a new work
- CONTROL VISIBILITY Visibility of works in collections of this type are controlled by the settings in the collection

Collection Participants

You can designate both groups and users as creators and managers of collections of this type.

Add Participants

Add group: as

Add user: as

Current Participants

Managers

Managers of collections of this type can edit collections other users have created, including adding to and removing works from a collection, modifying collection metadata, and deleting collections.

Collection managers	Action
repository-managers	<input type="button" value="Remove"/>
jane-smith@institution.edu	<input type="button" value="Remove"/>

Creators

Creators of collections of this type can create and manage their own collections.

Curated collection creators	Action
library-staff	<input type="button" value="Remove"/>

1 The tabs shown here reflect an example where the repo admin has created two distinct non-administrative set types of collections. If there are additional collection types, each additional type would have a tab and similar settings content.

2 The "Administrative collection" uniquely disables the Nestable and Multiple Membership options, to ensure it can continue to meet the existing functionality of Administrative Sets.

Collections

... [same content as previous example]

¹ Alternative approach to distinguishing between the pages for defining collection types (always a single page) and defining the settings and participants for each type (N number of pages, where N is the number of distinct collection types created).

² With this approach, the pages for defining settings and participants for each collection types are accessed within the "Settings and Participants" tab. The advantage with this approach is we don't have to worry about layout problems with many top-level tabs when a repository defines many collection types. The menu choices for each collection type can just wrap within the "Settings and Participants" page.

Showing 1 to 10 of 254 collections « 1 2 3 4 5 »

- 1** The "All Collections" tab is shown if the user has privileges to manage **all collections** in the repository (e.g., the repository manager/administrator).

If the user is not a repository manager/administrator but has privileges to manage collections other than ones she created, this tab should instead be labelled "Managed Collections".

The first tab is not shown at all to users who can only manage collections they've created.
- 2** **Type options:** [user | curated | etc] (Actual names should reflect the collections types defined for the repository.)

Visibility options: [Private | Open Access | Institution]

When the user selects one or more filters, the filter bar expands to show the current filter constraints, as shown below:

Filter collections:
Type ▾
Visibility ▾

Filtering by:
Type > User ✕
Visibility > Private ✕
✕ Clear filters

- 3** Ideally, this is implemented as a Datable, so the search box filters results and table columns are sortable.
- 4** Bulk actions apply to every collection currently checked. Options:

Bulk actions ▾
 Delete selected collections
- 5** Actions menu options:

Select ▾
 View collection
 Edit collection
 Delete collection
 Add existing works to collection
 Deposit new work through collection
- 6** Collection titles are linked to the Admin show page for the collection.

Showing 1 to 10 of 254 collections « 1 2 3 4 5 »

1 A normal user, meaning the user cannot manage any collections other than ones she has created, sees only the Your Collections tab.

The rest of the page is the same as shown to users with more collection management privileges.

2 If a repository has configured multiple collection types and it's possible for a given user to have creator privileges for more than one collection type, I believe we need to know which collection type the user wants to create before we display the Collection New page. If this is true, then one option would be to use the same approach as we currently do for creating new works, with a Select Collection Type modal:

Select type of collection ✕

User Collection

Exhibit

Close Create collection

repo-manager@institution.edu

Create New Collection

- Description
- Branding
- Visibility
- Sharing

Title

A name to aid in identifying the collection.

Description

B I U

Representative thumbnail

Additional fields

1 This is pretty much what currently exists in Hyrax, though we probably should evaluate whether the additional fields currently shown in the Collection edit page are appropriate for collections (rather than works, which is what some appear to be).

Create New Collection

- Description
- Branding
- Visibility
- Sharing

Branding

Optionally, you can upload a banner image and/or logo images to associate with this collection. If uploaded, these images will be displayed at the top of the collection page to provide unique branding for the collection.

Banner

An image to be displayed at the top of the collection page. For best results, upload an image (JPG, GIF or PNG) that is at least 120 pixels tall and 1200 pixels wide.

Choose file... No file chosen. 1

Logo image

One or more images to be displayed at the top of the collection page. For best results, upload an image (JPG, GIF or PNG) that is 40 pixels in height. Larger images will be resized to 40 pixels in height. 2

Choose file... No file chosen. 3

1 The user needs to be able to delete an existing banner, so if one is currently active, show a remove button:

Banner

An image to be displayed at the top of the collection page. For best results, upload an image (JPG, GIF or PNG) that is at least 120 pixels tall and 1200 pixels wide.

Choose file... some-banner-image.jpg Remove image

2 40px height is a guess. We should revisit this when we have a new Collection Show page implemented and see what is the optimal height.

3 The user needs to be able to delete existing images, so after at least one has been uploaded display in a table as shown below with a remove button. If we want to enable the logo images to be linked, the table should also have inputs for each image to enable the user to add a link and alt text for the image.

Logo image

One or more images to be displayed at the top of the collection page. For best results, upload an image (JPG, GIF or PNG) that is 40 pixels in height. Larger images will be resized to 40 pixels in height.

Create New Collection

Description

Branding

Visibility

Sharing

Collection Visibility

These settings determine who is able to view your collection. These settings control whether users can discover and view the collection page; they do not affect the visibility of items in the collection.

- Open Access** - Visible to all
- Institution** - Restrict visibility to <institution name>
- Private** - Keep to myself with an option to share

Release and Visibility of Works Deposited Through This Collection 1

The release and visibility settings below control when new works deposited through this collection are made available for discovery and download and who can discover and download them.

Release

You can impose a delay (embargo) before works in this collection are released for discovery and download.

- No delay -- release all works as soon as they are deposited
- Varies -- depositors can set the release date for an individual work:
 - Between "now" and
 - Between "now" and
- Fixed -- delay release of all works until

Visibility

After its release date, works in this collection can be discovered and downloaded by:

- Everyone -- all works in this collection will be public
- Varies -- default is public, but depositors can restrict the visibility of individual works
- Institution -- all works will be visible only to authenticated users of this institution
- Restricted -- all works will be visible only to repository managers and managers and reviewers of this collection

1 This whole section should only be shown if the "Control Visibility" setting has been enabled in the General Settings for this collection type.

Create New Collection

Description

Branding

Visibility

Sharing

Regardless of the visibility settings of this collection, you can share this collection with specific groups and users.

Add Sharing

Add group: as ¹

Add user: as

Currently Shared With ²

Managers

Managers of this collection can add to and remove works from the collection, modify collection metadata, and delete the collection.

User/Group	Action
cs-research-group	<input type="button" value="Remove"/>
jane-smith@institution.edu	<input type="button" value="Remove"/>

Depositors

Depositors of this collection can view the collection and add works to it, even if the visibility permissions of the collection otherwise would not permit them to view it.

User/Group	Action
library-staff	<input type="button" value="Remove"/>

Viewers

Viewers of this collection can view it even if the visibility permissions of the collection otherwise would not permit them to view it.

User/Group	Action
cs-department-admins	<input type="button" value="Remove"/>

¹ Hyrax currently only shows "View/Download" and "Edit" as options for role. These options would need to change to "Manager", "Depositor", and "Viewer."

² This section generally matches the layout we're using elsewhere, such as on the Participants tab of Admin Sets.

Create New Collection

Description

Branding

Visibility

Sharing

Workflow ¹

This collection must have a workflow associated with it. This workflow is applied to all works added to the collection. Select the workflow to be used for this collection below.

Default workflow

A single submission step, default workflow

One-step mediated deposit workflow

A single-step workflow for mediated deposit in which all deposits must be approved by a reviewer. Reviewer may also send deposits back to the depositor.

¹ This tab should only be shown if the “Workflow” setting is enabled in the General Settings for this collection type.
