Welcome to Samvera

A POWERFUL TOOL FOR REPOSITORY SOLUTIONS

Samvera™ is the new name for Hydra. Samvera is a grass-roots, open source community creating best in class digital asset management solutions for Libraries, Archives, Museums and others.

The Samvera software offers flexible and rich user interfaces tailored to distinct content types on top of a robust back end – giving adopters the best of both worlds.
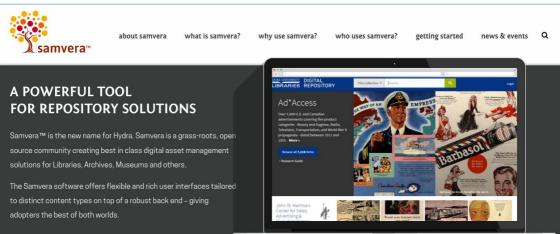

Be part of the Samvera Community to:

- Create the repository solutions you need
- Work with others on shared issues and solutions
- Feed in your ideas on what makes a good repository – and put them into action
- Learn from others to address common problems
